

# Resource Cards:

## Invertebrate *who am I?*

✂ Print out then laminate  
and cut into single cards.

### Spider

#### Clue

A good knitter, I use my work to trap my food.

I can live in your house or outside - it makes no odds to me.

#### Information

Because they are small, spiders have a lot of enemies. In this country creatures such as birds and frogs hunt them.

And of course, we human beings are also enemies to spiders as sometimes people that don't like them stand on them.

### Butterfly

#### Clue

On long summer days you will see me flutter.

With my long tongue I feed on nectar!

#### Information

There are 56 species of butterfly in the UK.

They are important pollinators.

Butterflies taste with their feet and live on an all-liquid diet.

### Beetle

#### Clue

I have strong armour on my back.

I come in lots of colours but often I am coloured black and I like to live in piles of rotting wood.

#### Information

Although they have two pairs of wings, beetles only use their hind wings for flying.

## Invertebrate *who am I?*

✂ Print out then laminate  
and cut into single cards.

### Ant

#### Clue

In hundreds and thousands we live and we work.

Building great cities under the soil.

#### Information

The legs of an ant are very strong, allowing them to run very quickly.

If a man could run as fast for his size as an ant can, he could run as fast as a racehorse.

### Worm

#### Clue

A gardener's friend, I'm not fussy about what I eat.

I live in the soil and help things to rot and recycle back into soil.

#### Information

Earthworms can live for 3-4 years, on average but have been found to be as old as 15 years!

### Ladybird

#### Clue

Brightly coloured to warn other animals and birds to leave me alone, I hibernate through the winter and only wake up in the spring when the temperature begins to warm.

I am a gardener's friend.

#### Information

A ladybird is a type of beetle.
